BOOKS

Computational Drawing with Functions

Computational drawing books has been prepared within the period between the year I was

graduated from my university department of the faculty of art and sciences (in summer 2011 to 2012.) All drawing inside the e-book were coded by an integrated open source processing development environment, and concluded with ControlP5 Library, user can interface with functions and giving the chance to intervene to drawing points.

There sections within the book are for describing there different programs. It's all are completing the drawings formed by the expresses of functions and algorithms turing inside it.
